

[German product portfolio for process technology at this year's AchemAsia](#)

AchemAsia puts the growth and core sectors of China's process industry in the center of focus. From 21st to 23rd May, 2019, HBE Fluid Equipment will also be exhibiting at the National Exhibition and Convention Center in Shanghai. At stand C69 in hall 7.1, visitors can get information about magnetic systems and canisters, agitators, flow meters and pumps – made in Germany.

[From calculation to your product](#)

To achieve an optimum performance, the German manufacturer DST Dauermagnet-SystemTechnik GmbH offers a special service to our customers. They make sure the technical feasibility of every inquiry by carrying out a series of calculations and simulations. This means that they work with concrete data and design guidelines directly from the planning phase. Professional simulation software helps them to consider different application parameters like pressure, torque and speed.
